seminar

What is research infrastructure in the context of the university?

Thursday 8 June 2017 | CEITEC A35, room 211

YOU WILL LEARN:

- » What are research infrastructures (RIs) and core facilities (CFs) and why are they important for universities
- » Good practices in the management and usage of RIs and CFs
- » Management models and their strengths and weaknesses
- » Experience with different models, policies and structures from other universities
- » Current interesting topics related to RIs and CFs on national and European level

PROGRAMME

9:00	Registration
9:30	Jiří Nantl (<i>director; CEITEC MU</i>): What is research infrastructure in the context of the university?
10:00	Luděk Matyska (<i>director; ICS MU</i>): e-Infrastructures and their role in science
10:30	Valentina Adami (<i>coordinator of core facilities; CIBIO</i>): CIBIO - Boosting excellence in Italian University through Core Facilities
