

# Central European Institute of Technology

# Molecular Medicine Seminar

Tuesdays at 9.30 a.m., room no. 211 / A35

	_	u	т	_	N/I	R	_	ш
-		_		_	IVI		_	•

06/09/2016 Ivan D'Orso, Ph.D.

Transcriptional Regulatory **Networks: New Lessons** from HIV and Eukaryotic

Cells

Matouš Hrdinka 20/09/2016

room 145

Non-degradative ubiquitination controls innateimmune signalling

27/09/2016

**Alexey Davydov** (Dmitriy Chudakov's

Full length profilling of antibodies repertoires

### **OCTOBER**

04/10/2016 Martin Krzywinski

gropup)

How to communicate information - clearly and beautifully

11/10/2016

Václav Šeda

(Marek Mráz's group)

Crosstalk of microenvironmental interactions and BCR signalling in malignant B

cells

25/10/2016

**Maria Elena** Candella (Mary O'Connell's

group)

Pursuit of the endogenous RNA that generates an innate immune response

## **NOVEMBER**

01/11/2016

Pavla Gajdušková (Dalibor Blažek's group)

The regulation of gene expression by a new mRNA-binding factor

08/11/2016

Ann-Kristin Östlund TBA **Farrants** 

15/11/2016

Kateřina Černá

(Marek Mráz's group)

microRNAs involved in DNA damage response in malignant B cells and their biological and clinical

relevance

22/11/2016

Jitka Malčíková (Šárka Pospíšilová's Clonal evolution in chronic lymhocytic leukemia

group)

29/11/2016 Jitka Vaňáčková

(Ondřej Slabý's group)

Genome-wide expression profilling and mutation analysis as the diagnostic basis for personalized pediatric cancer treatment plans

# **DECEMBER**

06/12/2016

**Angela Gallo** 

RNA Editing dynamically rewrites the cancer code

13/12/2016

**Nikola Tom** (Šárka Pospíšilová's

group)

TOTEM - software for automated NGS pipeline configuration

### **JANUARY**

03/01/2017

Kamila Součková (Ondřej Slabý's group)

Annual fish Nothobranchius furzeri -

novel vertebrate model for studying renal cell carcinoma
