CEITEC Workshop 08/09/2014: Biomaterials for tissue engineering

9:30 – 10:15	Laura Kaufman (Columbia University, NYC, USA)
	 Collagen Gels: From Fundamental Questions to Applied
	Goals.
10:30 – 11:00	Dáša Doležalová (Masaryk University Brno, CR)
	 Stem Cell-based Therapies in Neuroregenerative
	Medicine
11:15 – 11:45	coffee break
12:00 – 12:45	Viera Khunová (Technical University Bratislava, SR)
	 Polymer nanocomposites based on natural nanotubes for
	medical applications
13:00 – 14:00	lunch (Academic Restaurant)
14:00 – 14:45	Lucy Vojtová (CEITEC BUT, CR)
14:00 – 14:45	Lucy Vojtová (CEITEC BUT, CR)Third generation scaffolds for bone regeneration
14:00 - 14:45 15:00 - 15:40	
	Third generation scaffolds for bone regeneration
	 Third generation scaffolds for bone regeneration Lucie Wolfová (Contipro, CR)
15:00 – 15:40	 Third generation scaffolds for bone regeneration Lucie Wolfová (Contipro, CR) Hyaluronan based hydrogels for tissue engineering
15:00 – 15:40	 Third generation scaffolds for bone regeneration Lucie Wolfová (Contipro, CR) Hyaluronan based hydrogels for tissue engineering
15:00 – 15:40 15:50 – 16:10	 Third generation scaffolds for bone regeneration Lucie Wolfová (Contipro, CR) Hyaluronan based hydrogels for tissue engineering coffee break
15:00 – 15:40 15:50 – 16:10	 Third generation scaffolds for bone regeneration Lucie Wolfová (Contipro, CR) Hyaluronan based hydrogels for tissue engineering coffee break Alexander Werner (BioBank, Germany)
15:00 – 15:40 15:50 – 16:10	 Third generation scaffolds for bone regeneration Lucie Wolfová (Contipro, CR) Hyaluronan based hydrogels for tissue engineering coffee break Alexander Werner (BioBank, Germany) Freezing and long-term storage of biological samples - quality requirements and technical solutions Stefan Chabierski (BioBank, Germany)
15:00 - 15:40 15:50 - 16:10 16: 10 - 16:35	 Third generation scaffolds for bone regeneration Lucie Wolfová (Contipro, CR) Hyaluronan based hydrogels for tissue engineering coffee break Alexander Werner (BioBank, Germany) Freezing and long-term storage of biological samples - quality requirements and technical solutions
